PROJECT Description

- ***Project Definition***

The Online Wedding Wear System Is Developed For Online Wedding Wear. An Shopping Is A Formal Decision-Making Process By Which A People Chooses An To Wedding Wear Designing A Choose Wedding Wear System Is A Method By Which Customer Make A Choice Between Options. A Online Wedding Wear System Enforces Rules To Ensure Valid Wear. And How Wear Are Counted And Aggregated To A Final Result. The Wedding Wear System Is An Extensive And Powerful Script Written In PHP With Linux. Give The Platform To Choose Wedding Wear. People Can Do Purchase Wedding Wear From This Website Easily. Users Can Post Their Requirements Through This Website And Choose Respective Wedding Wear.

- ***Features***

- * Project Is Categorized Into Admin And Users.
- * Project Provides Online Wedding Wear For People.
- * Front Page Display Wedding Wear, Front Page Featured All The Various Wear And Latest Schedule.
- * Categories Of Wear Can Be Configured By Related Admin
- * Contact Us Form For Getting Feedback From Visitors.
- * Secure Login System.

- ***Admin Panel Feature***

- * Administration On Admin Panel.
- * Dash Board On Admin Home Page.
- * Number Of Approved/Unapproved Users.
- * Display Wedding Wear For All The Users.
- * Display Result Of Order.
- * Manage Profile To Edit/Remove Profile.
- * Manage Registrations To Edit/Remove Registrations.
- * Manage Wedding Wear To Add/Edit/Remove/Search Product.
- * Manage Order To Edit/Remove Order.

- * Manage To Edit/Remove Payment.
- * Manage Country, State, City, Area To Edit/Remove Location.
- * Manage Feedback, Contact To Delete.

PROJECT PROFILE

<u>FIELD</u>	<u>DESCRIPTION</u>
Project Name	Online Wedding Wear
Project Category	Web Application
Objectives	To Design And Implement User Friendly Online Purchase Wedding Wear System Where User Can Purchase Product For Wedding.
Technology	PHP With WAMP (<i>WIndows Apache MySQL & PHP</i>)
Front End	PHP
Back End	MYSQL
Project Guide	Mss. Vidhi V patel

Submitted To	M.L Parmar clg
Developed By	Katrodiya Meet pareshbhai Jasoliya Darshan Sanjaybhai

HARDWARE & SOFTWARE REQUIREMENT

Hardware Configuration

<u>TYPE</u>	<u>DESCRIPTION</u>
Processor	Generation 4 Processor
Internet Connection	Internet connection required because the website is online working and can't be used as offline source.
Physical Memory(RAM)	512MB

Hard Disk Space	
-----------------	--

Software Configuration

<u>TYPE</u>	<u>DESCRIPTION</u>
Operating System	Windows
Language	PHP
Browser	Recommended for Google Chrome, You have used any browser
Server Configuration	MYSQL(Version 5.0)

TECHNOLOGY USED

❖ Overview Of PHP

Precisely, PHP Is A Very Powerful Server-Side Scripting Language Like Asp For Developing Dynamic Web Applications. Using PHP, You Can Build Interactive And Dynamic Websites With Ease, You Have Some Idea About The C Language Then Learning PHP Should Be A Fairly Simple Task For You.

It Is Free, It Is Suitable For Web Development, It Is Efficient, It Is Widely Used And It Is Considered To Be The Most Powerful Alternative To Microsoft's Asp, Php Script Can Be Embedded Straight Into The Heart Of Html Code Just Like Asp.

One Of The Reasons Of The Why PHP Is Getting More Popular Is That Its Syntax Is Very Much Similar To That Of C And Pert. PHP Is Compatible With Various Web Servers Like Apache And The Microsoft's S As Well, All The PHP Scripts Are Executed On The Server (Apache, IIS Etc) And It Supports Various Databases Like MYSQL, Oracle, Solid, Generic ODBC Etc; However, It Is Mostly Used With MYSQL. Another Reason For The Ever-Increasing Popularity Of PHP Is That It's Free To Download And Use.

What Does A PHP File Contains Is A Common Question Asked By Many PHP Learners. A PHP File Has An Extension Of .PHTML, .PHP Or .PHP3 And It May Contain Various HTML Tags, Texts And Scripts. Although A PHP File Contains Scripts But When It Is Returned To The Browser, It Is Returned As A Plain HTML File, We Shall Learn More About PHP In Our Coming Sections.

❖ ***Features Of PHP***

It Is Most Popular And Frequently Used World Wide Scripting Language, The Main Reason Of Popularity Is; It Is Open Source And Very Simple.

□ ***Standard CGI, Fast CGI And Apache Module Support***

As A Standard CGI Program, PHP Can Be Installed On Any UNIX Machine Running Any Unix Web Server, With Support For The New Fast CGI Standard, PHP Can Take Advantage Of The Speed Improvements Gained Through This Mechanism. As An Apache Module, PHP Becomes An Extremely Powerful And Lightning Fast Alternative To CGI Programming.

□ Access Logging

With The Access Logging Capabilities Of PHP, Users Can Maintain Their Own Hit Counting And Logging. It Does Not Use The Systems Central Access Log Files In Any Way And It Provides Real-Time Access Monitoring. The Log Viewer Script Provides A Quick Summary Of The Accesses To A Set Of Pages Owned By An Individual User, In Addition To That, The Package Can Be Configured To Generate A Footer On Every Page Which Shows Access Information. See The Bottom Of This Page For An Example Of This.

□ Access Control

A Built-In Web-Based Configuration Screen Handles Access Control Configuration. It Is Possible To Create Rules For All Or Some Web Pages Owned By A Certain Person Which Place Various Restrictions On Who Can View These Pages And How They Will Be Viewed. Pages Can Be Password Protected, Completely Restricted, Logging Disabled And More Based On The Client's Domain, Browser, E Mail Address Or Even The Referring Document.

□ ***Postgresql Support***

Postgresql Is An Advanced Free RDBMS. PHP Supports Embedding Postgresql SQL Queries Directly In .HTML Files.

❖ ***Overview Of WAMP (Windows Apache MySQL & PHP)***

WAMP Is An Acronym That Stands For Windows, Apache, MYSQL, And PHP. It's A Software Stack Which Means Installing WAMP Installs Apache, MYSQL, And PHP On Your Operating System (Windows In The Case Of WAMP). Even Though You Can Install Them Separately, They Are Usually Bundled Up, And For A Good Reason Too.

What's Good To Know Is That WAMP Derives From LAMP (The L Stands For Linux). The Only Difference Between These Two Is That WAMP Is Used For Windows, While LAMP – For Linux Based Operating Systems.

Let's quickly go over what each letter represents:

“**W**” stands for Windows, there’s also LAMP (for Linux) and MAMP (for Mac).

“**A**” stands for Apache. Apache is the server software that is responsible for serving web pages. When you request a page to be seen by you, Apache grants your request over HTTP and shows you the site.

“**M**” stands for MySQL. MySQL’s job is to be the database management system for your server. It stores all of the relevant information like your site’s content, user profiles, etc.

“**P**” stands for PHP. It’s the programming language that was used to write Word Press. It acts like glue for this whole software stack. PHP is running in conjunction with Apache and communicating with MySQL.

❖ Overview Of MySQL?

MySQL Is An Open-Source Relational Database Management System (RDBMS). It Is The Most Popular Database System Used With PHP. MySQL Is Developed, Distributed, And Supported By Oracle Corporation.

The Data In A MySQL Database Are Stored In Tables Which Consists Of Columns And Rows.

MySQL Is A Database System That Runs On A Server.

MySQL Is Ideal For Both Small And Large Applications.

MYSQL Is Very Fast, Reliable, And Easy To Use Database System. It Uses Standard SQL

MYSQL Compiles On A Number Of Platforms.

MYSQL Architecture With Pluggable Storage Engines

Existing System

The Existing System Is Currently Handled Manually. All The Core Functionalities Of The Current System Are Oriented Manually. All The Functionalities Are Performed With Human Invention. Presently Movie Tickets Are Sold Or Booked At The Site Of Multiplexes. Tickets Are Bought On-Site At The Counter In Theater Or By Tele-Booking Of Tickets By Individuals.

An Online Wedding Wear System Involves Two Types Of Users:

- ADMIN
- USER

ADMIN ROLE:

- The Main Admin Add New Product And Confirm Or Reject Users
- The Main Admin View All Product Details. He / She View Feedback Of Site And Active Or Inactive To Display In Front Side. Main Admin Manage Product Information.
- He / She Also Show Registered User For Purchases Wedding Wear Process.
- To Use The Services Of Wedding Wear Users Can Request To Admin By Registration.
- The Admin Manages Screen Details And Generate Products Layout For Each Screen.

- He / She Creates Product For Wedding And Manage All Product. The Admin Creates Price For Wedding Wear And All Products For Wedding.
- The Admin Shows Products Details And All Show For Wedding.

USER ROLE:

- User Can View Now Present All Products.
- User Can View All The Screen.
- User Search Any Product.
- User Can Purchase Product By Secure Payment. User Can Also Use Quick Purchase.
- User Can Give Product Review And Also Show Product Reviews.

- User Give Site Feedback And Show Site Feedback Which Allow By Main Admin.
- He / She Also Show Detail Information About Products.
- Users Must Be Registered For Purchases Wedding Wear Process.

FEASIBILITY STUDY

USER

- ✓ New Registration For Users.
 - This Component Used To Register New Member Like Users in The Website Database. Using This Interface Website Can Introduce New User To Website As Well As Users Can Modify His/Her Detail To The Database.
- ✓ Confirmation Of User.

- Confirmed Product Can Handle Its User By Sending Confirm Mail Or Payment With Userid And Password To Respective User.

- ✓ Do Purches Product
 - After Registration Confirmed User Can Do Purches From This Website By Logging In With Their Respective Userid And Password.

ADMIN

- ✓ Manage Product
 - This Component Used For Manage Product Of The Website So That Admin Has Fully Rights For Remove Product And Also For Seeing The Product's Information. Admin Can Confirm Product By Sending Mail Or Secure Payment With Userid And Password.

- ✓ Manage User
 - This Component Used For Manage User of The Website So That Admin Has Fully Rights For Seeing The User's Personal Information. Admin Cannot Confirm User, But Admin Can Confirm Their Respective Candidate.

- ✓ Manage Payment
 - This Component Used For Manage Payment of The Website So That Admin Has Fully Rights For Update Payment

And Also For Seeing The User's Personal Information. Admin Can Confirm Payment by Sending Payment with Userid And Password.

✓ Manage Order

- This Component Used For Manage Order Of The Particular User So That Keep Track Of Order. Admin Can See All The Order Of All The User., Admin Has Fully Rights For Update Order And Also For Seeing The User's Personal Information.

✓ Manage Dashboard

- This Component Used For Manage Dashboard or website By Counting All The System Components.

✓ Manage Profile

- This Component Used For Manage User's Profile Means Manage Country, Manage State, Manage City And Manage Area, Admin Can Add/Edit Or Remove Particular User's Profile.

✓ Manage Services ○ The Component Used For Manage All The Service or The Year Along

With The Date. Admin Can Add/Edit Or Remove Particular Service Or Products.

✓ Manage feedback

- The Component Used For Manage Feedback Of The Website. Admin can Remove Particular Feedback.

- ✓ Manage User's Bank-Details
 - This Component Used For Manage User's Bank-Details of The Website So That Keep Track Of User's Bank-Details. Admin Has Fully Rights Update User's Bank-Details For Seeing The User's Personal Information.

- ✓ Manage Categories
 - The Component Used For Manage Categories Of The Products in the Website So That Keep Track of The Categories. An Can Add/Update /Search Or Remove Particular Categories.

- ✓ Manage Subcategories
 - The Component Used For Manage Subcategories Of The Products in the Website So That Keep Track of The Subcategories. An Can Add/Update /Search Or Remove Particular Subcategories.

REQUIREMENT GATHERING

User Requirements

The user requirements for the system are making to the system fast, flexible, less prone errors and reduce expenses and save time.

System Goals

- User can easily access the all services of the system.
- End user can easily use.
- Establish trust on a system.

System Requirements

At the level of system requirements the software, the hardware and the interaction requirements need to specify. Also require the internet connection to use the all services of this system.

SCOPE

The Web Application Unique Design And Easy Navigation Will Ensure You To Want Wedding Ware In Any Unique Designs Around Our System Without Much Fuss. You Can Purchase Wedding Ware Or Wedding Products Of Running Style In Any Unique Designs As Per Your Wish.

This System Is Running 24 Hours In Day, So You Can Purchase Wedding Ware Or Wedding Products Anytime And From Anywhere. You Can View All The Products Choice Wise. You Can Also View Any Type Of Design In Wear. Users Can Purchase More Than One Products From This Site.

EXPECTED ADVANTAGES

➤ **High Security**

- There A High Security Mechanism Provided By The Proposed System. No Unauthorized Person Can Change In The Data Those Are Stored In Website. Only Authorized Person Can Make Login.

➤ **Less Time**

- In Our Web-Site, All The Process Are Carried Out By Computer So Obviously It Will Required Less Time Than Traditional Inventory System And In That Sense, It Will Require Less Time To Do Purchase Product And Can Process Data Very Fast

➤ **Accuracy**

- In Our Web System There Are Less Amount Of Human Activities Are Involved In That Case It Will Have Less Effect. The Website Will Perform All Task Dynamically Including News; In That Case The Data That We Receive Will Be Accurate And Much More Reliable Than The Data That Generated Previously.

➤ **Easy To Use**

- Online Wedding Ware System Is Accessible Round The Clock. So You Can Purchase Wedding Ware Or Wedding Products Anytime And From Anywhere. You Can View All The Products Choice Wise. You Can Also View Any Type Of Design In Wear. You Can Purchase Wedding Ware And Its Related Products. You Can Receive The Information Related To Wedding Ware And Its Related Products From This Website.

DATA FLOW DIAGRAM

Data Flow Diagram:

The Data Flow Diagrams Are An intuitive Way Of Showing How Data is Processed By A System. The Symbols Used in The DFD For This Project Are Shown Bellow.

Services

The screenshot shows a light-colored website template for "WEDDING WEAR". The header includes a navigation bar with links for HOME, SERVICES, PRODUCTS, CATEGORIES, PAGES, PORTFOLIO, CONTACT, PROFILE, and a "GET STARTED" button. Below the header, a section titled "WE'RE GOOD AT THESE AREAS TO WORK" lists four services with icons and descriptions:

- shopping**: The main services provided by the online websites are the shopping only.
- Discount**: discounts are also offered by the many online companies.
- Payment mode**: payment mode is totally depending upon you whether you want to pay by the credit cards or to cash on delivery.
- Content writing**: Lorem ipsum is simply free text dolor sit amet consectetur adipiscing elit. When an unknown printer took a galley of type and scrambled it to make a type specimen book.

The footer features a search bar, a toolbar with various icons, and system status information (ENG US 11:40 AM 3/25/2022).

The screenshot shows a dark-themed website template for "WEDDING WEAR". The header is identical to the previous template. Below the header, a section titled "WE TAKE CARE FOR CHOOSE YOUR WEDDING WEAR" features a small image of a person working at a desk. To the right, three promises are listed in boxes with checkmarks:

- We promise to respect your time
- We hire only professionals you can trust
- We promise to provide up front pricing

The footer is identical to the first screenshot, featuring a search bar, a toolbar with various icons, and system status information (ENG US 11:41 AM 3/25/2022).

The screenshot shows a Windows desktop environment. At the top, there is a taskbar with several icons, including a search bar and system status indicators. The main focus is a web browser window titled "Wedding Wear 2 - Dashboard". The browser's address bar shows the URL "localhost/vidhi/Wedding%20Wear/Wedding%20Wear/layerdrops.com/moniz/services.php". The webpage itself has a dark header with the text "WEDDING WEAR" and a "GET STARTED" button. Below the header, there is a navigation menu with links like HOME, SERVICES, PRODUCTS, CATEGORIES, PAGES, PORTFOLIO, CONTACT, PROFILE, and a "Our services list" link. The main content area is titled "WHAT WE'RE OFFERING" and features three circular sections: "Shopping" (with a shopping cart icon), "Discount" (with a discount icon), and "Payment mode" (with a payment icon). Each section contains a brief description and a right-pointing arrow icon.

Products

The screenshot shows a web browser window with the following details:

Cart Page

Screenshot of a web browser displaying the 'Cart Page' for 'WEDDING WEAR'. The page shows a single item in the cart: 'Bridal Red Lehenga'.

Product Id	Item	Price	Quantity	Total	Remove
3	 Bridal Red Lehenga	30000	- 1 +	30000	X

Below the cart table, there is a coupon code input field labeled 'Enter Coupon Code' and a green 'Apply coupon' button. To the right, there are summary details:

Subtotal	30000
Shipping Cost	0.00
Total	30000

The browser's address bar shows the URL: `localhost/vidhi/Wedding%20Wear/Wedding%20Wear/layerdrops.com/moniz/cart.php`. The taskbar at the bottom of the screen includes icons for File, Open, Save, and various Microsoft Office applications like Word, Excel, and PowerPoint.

Shipping Page

The screenshot shows a Windows desktop environment with a browser window open to a website for "Wedding Wear". The title bar reads "Wedding Wear 2 - Dashboard" and "Shipping || VIDHI || Wedding We...". The URL in the address bar is "localhost/vidhi/Wedding%20Wear/Wedding%20Wear/layerdrops.com/moniz/checkout.php?cart_id=54". The page content is titled "Billing Details". It contains several input fields: a dropdown for "Country" (set to "India"), two side-by-side fields for "First Name" and "Last Name", a large text area for "Address", a smaller text area for "Appartment, Unit, etc. (optional)", a field for "Town / City", and two more side-by-side fields for "State" and "Zip Code". A "Submit" button is located at the bottom left of the form area. The Windows taskbar at the bottom includes icons for File Explorer, Task View, File History, OneDrive, Mail, Photos, Videos, Word, Excel, and Edge. The system tray shows the date and time as "ENG US 3/25/2022 11:48 AM".

The screenshot shows a Windows desktop environment with a browser window open to the same "Wedding Wear" website. The title bar and URL are identical to the previous screenshot. The page content is titled "Your Order". It displays a table of order details:

Product	30000
Product Name	Bridal Red Lehenga
Subtotal	30000
Cart ID	54
Shipping	0.00
Total	30000

To the right of the table, there is a callout box with two payment options:

- Direct Bank Transfer**
Make your payment directly into our bank account. Please use your Order ID as the payment reference. Your order won't be shipped until the funds have cleared.
- Paypal payment**

The Windows taskbar and system tray are visible at the bottom, showing the date and time as "ENG US 3/25/2022 11:49 AM".

Payment

The screenshot shows a payment form titled "Confirm Your Payment". The form fields include:

- Owner (input field)
- CVV (input field)
- Card Number (input field)
- Current Date (input field)
- Expire Dates (dropdown menus for Month and Year, showing Jan 2020)
- Payment Method Logos: MasterCard, VISA, PayPal
- A green "SUBMIT" button

The browser title bar shows "Wedding Wear 2 - Dashboard" and "Indian Wedding Wear Template". The address bar shows "localhost/vidhi/Wedding%20Wear/Wedding%20Wear/layerdrops.com/moniz/payment.php?shipting_id=2". The page header includes "WEDDING WEAR", "HOME", "SERVICES", "PRODUCTS", "CATEGORIES", "PAGES", "PORTFOLIO", "CONTACT", "PROFILE", and "GET STARTED". The taskbar at the bottom shows various application icons and the system clock "11:49 AM 3/25/2022".

About Page

The screenshot shows a web browser window with the title bar "Wedding Wear 2 - Dashboard" and "About || VIDHI || Wedding Wear". The URL in the address bar is "localhost/vidhi/Wedding%20Wear/Wedding%20Wear/layerdrops.com/moniz/about.php". The page has a dark header with "WEDDING WEAR" and a "GET STARTED" button. Below the header is a large image of three professionals (two women and one man) in business attire. To the right of the image, the text "REASONS WHY WE ARE BEST" is displayed, followed by a bulleted list of benefits: "No Crowd and POS Queue. Easy Checkout Process and Fast Delivery Options. Clear Information about Products and Vendors. Easy to Find Rare Products Online." Below this is a list of checked items: "The best user interfaces", "Quick smooth online shopping", "Convenience of Not Going to Stores.", "Discreet Shipping.", and "Quick and Easy Product Replacement and Refund.". The bottom of the screen shows a Windows taskbar with various icons and the date/time "ENG US 11:52 AM 3/25/2022".

The screenshot shows a web browser window with the same title bar and URL as the previous screenshot. The page content features a large white box with four performance metrics: "1860 Order completed" (with a thumbs-up icon), "1950 Active clients" (with a person icon), "93 Cups of coffee" (with a coffee cup icon), and "9670 Happy clients" (with a star icon). The bottom of the screen shows a Windows taskbar with various icons and the date/time "ENG US 11:53 AM 3/25/2022".

Feedback

WHAT THEY ARE TALKING ABOUT INDIAN WEDDING WEAR?

• Customer feedback

Krinal katrodiya
Satisfied customers

I absolutely adore the trendy styles this store offers. The clothes fit so well and they look amazing on a curvy figure. I really appreciate this option and the quality of the goods is so great that I will order product in the future. Thank you so much for making me feel beautiful!

The screenshot shows a website titled "WEDDING WEAR" with a dark background. The main heading is "WE TAKE CARE FOR CHOOSE YOUR WEDDING WEAR." Below this is a small image of a person writing on a document. A text block states: "this site is simply dummy text of the printing and typesetting industry. Have you done google research." To the left of the text is a gear icon. On the right, there are three boxes with promises, each featuring a green checkmark icon:

- We promise to respect your time
- We hire only professionals you can trust
- We promise to provide up front pricing

The browser address bar shows "localhost/vidhi/Wedding%20Wear/Wedding%20Wear/layerdrops.com/moniz/our-mission.php". The taskbar at the bottom includes icons for File Explorer, Task View, File, Print, Mail, Photos, OneDrive, Edge, Word, Excel, and Powerpoint.

The screenshot shows a web browser window with two tabs: "Wedding Wear 2 - Dashboard" and "Our Mission || VIDHI || Wedding". The main content area has a dark header with "WEDDING WEAR" and a navigation menu. Below the header is a green banner with the text "WEDDING WEAR SOLUTIONS". There are three images with captions: "Business process" (a hand arranging wooden blocks), "Tread Of Fashion" (two people looking at a computer screen), and "Global solutions" (a group of people giving each other high-fives). The bottom of the page shows a Windows taskbar with various icons and system status.

Profile Page

The screenshot shows a web browser window with two tabs: "Wedding Wear 2 - Dashboard" and "Profile || VIDHI || Wedding Wear". The main content area has a dark header with "WEDDING WEAR" and a navigation menu. Below the header is a "Click here to Login" button. The page contains several input fields for user profile information: "Fname*" and "Last Name*", "Date Of Birth*" and "Gender*", "Address*", "City*" and "State*", and "Email Id*". The "Email Id*" field contains the value "vidhi katrodiya". The bottom of the page shows a Windows taskbar with various icons and system status.

Bank Details Page

Screenshot of the 'Bank Detail' page from the 'Wedding Wear' website.

The page title is "Bank Detail || VIDHI || Wedding". The URL is "localhost/vidhi/Wedding%20Wear/Wedding%20Wear/layerdrops.com/moniz/bank_detail.php".

The header includes a logo for "WEDDING WEAR" and a navigation menu with links: HOME, SERVICES, PRODUCTS, CATEGORIES, PAGES, PORTFOLIO, CONTACT, PROFILE, and GET STARTED.

The main form fields are:

- Bank Name*
- Bank Branch*
- Accounter Name*
- Accounter Name
- Account No*
- Account Type*
- IFSC Code*
- Mobile No*

Checkboxes for "Remember me" and "Save" button.

System tray icons and status bar showing "ENG 11:51 AM US 3/25/2022".

Portfolio

Screenshot of the 'Portfolio' page from the 'Wedding Wear' website.

The page title is "Portfolio || VIDHI || Wedding Wear". The URL is "localhost/vidhi/Wedding%20Wear/Wedding%20Wear/layerdrops.com/moniz/portfolio.php".

The header includes a logo for "WEDDING WEAR" and a navigation menu with links: HOME, SERVICES, PRODUCTS, CATEGORIES, PAGES, PORTFOLIO, CONTACT, PROFILE, and GET STARTED. A message "Recent order completed" is displayed.

The main content features a section titled "ORDER SHOWCASE" with four images of models in traditional Indian attire:

- Wedding wear (grey lehenga)
- Ethnic wear (red lehenga)
- Men accessories (orange sherwani)
- Women accessories (black saree)

Filter options include "All(8)", "Wedding wear", "Ethnic wear", "Women accessories", and "Men accessories".

System tray icons and status bar showing "ENG 11:56 AM US 3/25/2022".

OUTPUT REPORT

TESTING

Testing Procedure & Implementation

1] TESTING :

Testing Plays A Vital Role In The Success Of The System. System Testing Makes A Logical Assumption That If All Parts Of The System Are Correct, The Goal Will Be Successfully Achieved. Once Program Code Has Been Developed, Testing Begins. The Testing Process Focuses On The Logical Internals Of The Software, Ensuring That All Statements Have Been Tested, And On The Functional Externals, That Is Conducted Tests To Uncover Errors And Ensure That Defined Input Will Produce Actual Results That Agree With Required Results.

- Testing Is More Than Just Debugging. Producing High Quality Software Means
- Providing Users With Products That Meet Their Needs And Expectations. Software success

- Is A Quality Product, On Time And Within Cost. Thorough Testing Can Solve Critical Mistakes. Testing Should, Therefore
 - ✓ Validate Performance (Verification & Validation)
 - ✓ Detect Errors
 - ✓ Identify Inconsistencies
 - ✓ Quality Assurance
 - ✓ Software Testing Is A Trade-Off Between Budget, Time And Quality.

2] OBJECTIVES OF TESTING:

- Testing Is A Process Of Executing A Program With The Intent Of Finding The Error
- A Good Test Case Is One That Has A High Probability Of Finding An Unpredictable Error.
- A Successful Test Is One That Provides Solution For Unpredictable Error.
- The Minimum Aim Of Testing Process Is To Identify All Defects Existing In Software Product Testing Accomplishes a variety Of Things, But Most Importantly It Measures The Quality Of The Software That Is Developed.

3] TESTING PLAN:

- ✓ Specifications Of The Product Would Be Related To:
- ✓ Functions Of The System.
- ✓ Response Criteria

- ✓ Volume Constraints (No. Of Users)
- ✓ Stability Criteria (24 Hour)
- ✓ Database Responses (Flushing, Cleaning)
- ✓ Network Criteria (Network Traffic)
- ✓ Compatibility (Environment & Browsers)
- ✓ User Interface / Friendliness Criteria
- ✓ Modularity (Ability To Easily Interface)
- ✓ Security

4) **TYPES OF TESTING:**

- Unit Testing
- Integration Testing
- Validation Testing
- System Testing

Unit Testing:

Unit Testing Focuses Verification Effort On The Smallest Unit Of Software Design The Module Unit Testing Exercise Specific Paths In The Module's Control Structure To Ensure Complete Coverage And Maximum Error Detection

Integration Testing:

Integration testing addresses the issues associated with the dual problems of verification & program construction. After the software has been integrated a set of high-order tests are conducted/

Validation Testing

At the end of Integration Testing, software is completely assembled as a package, interfacing errors have been uncovered and correction testing begins. Software Testing & Validation is achieved through serried of black box tests that demonstrate conformity with the requirements.

System testing:

System testing is series of different tests whose primary purpose is to fully exercise the computer based system, Although each test has a different purpose, all the work should verify that all system elements have been properly integrated and perform allocated functions.

5] TESTING METHODOLOGY:

To be truly robust, distributed applications require more than simple functional testing before release into production. At least one and preferably all of the following types of testing before releasing application to customers should be performed.

- ✓ Performance Testing
- ✓ Load Testing
- ✓ Stress Testing
- ✓ Endurance Testing

6] TESTING PROCEDURE:

The testing part forms an important aspect of any System. System testing makes a logical assumption that if all the parts of the system are correct, the goal will be successfully achieved. Philosophy behind testing the system is to find errors & rectify it.

The system test change is transitional one, as it represents the period during which control of the newly developed system passes from the hands of the development team to final users. It is therefore a critical point as it is the last opportunity to check the system before it is being used. The testing stage seeks to ensure following aspects of system from user point of view:

- Completeness
- Reliability
- Correctness

Thus a testing plan is necessary, as it will aid to maximize the effectiveness of discovering error by early & controlled production of test plans & test specification.

Test Cases :

1) Purpose:

The main purpose of test cases is that the system should flow as it has been made, even if user puts inputs in a wrong manner the output generated will give error. The flow of the system should go as it is defined by the developer.

2) Required Input:

There are many inputs in the forms which can not be explained here as it will be too lengthy to give explanation of each & every input. But the expected validations are kept so we will not be able to encounter any problem in the system.

3) Expected Result:

The result would be expected as per the system is made by the developer. The system is robust so even if user tries to put value other than expected value. validations are kept at each & every point so the output will be positive in each & every case.

Test Cases Table shows the functional requirements used to write the test cases along with the test - case numbers for each test case and a short description of the test cases .

TABLE : LIST OF TEST CASES .

<u>Functional Requirement No.</u>	<u>Test Case No.</u>	<u>Description</u>
FR01	TC01	To test, registration form all field inputted is valid or not.
FR02	TC02	To test, the login / authentication interface for the users according to user types.
FR03	TC03	To test, user logged in or not and update field value are valid.
FR04	TC04	To test, all movie display properly or not.

FR05	TC05	To test, movie booking process work properly or not.
------	------	--

The following example includes the steps that should be taken by the user , the conditions that should be met for the successful execution of the test case , and the end result that should be met for the test cases to pass.

- ✓ TC01 : To test the Login / Authentication interface
- ✓ Input : Username and Password
- ✓ Output : Valid Destination Page Valid
- ✓ Range : User Name Alphanumeric , Password
- ✓ End Messages / Result
- ✓

- 1.) If (User == Valid User) , navigate to their page
- 2.) If (User != Valid User) , an error message is displayed on the Login interface .

Testing Results

This section lists the results that were produced by running the test cases. Table 3 lists the test cases that were used while testing the interface along with the expected result and the actual results for each test case.

TABLE : LIST OF TEST-CASE RESULTS.

<u>Test Case Number</u>	<u>Expected Result</u>	<u>Actual Result</u>
-------------------------	------------------------	----------------------

TC01		TC01
TC02		TC02
TC03		TC03
TC04		TC04
TC05		TC05

Navigation Testing:

Navigation testing confirms that all internal and external links are working properly. There is no any broken link or orphan page in application. Functional, integration, system, regression, performance and load testing's come under black box testing's Functional, integration testing is done in white box also.

Result:

In An Online Movie Ticket Booking System - internal and external links are working properly as expected results.

LIMITATION & FOOTER SCOPE

Online Wedding Wear System Is Limited To Only Online Wedding Wear And It's Related Product System, So That They Want To Introduces New Things In Their Existing System.

Misuse Users Data And Personal Information Purchase By Others Without The Knowledge Of The Users.

Limited Access To Internet Or Limited Understanding On Part Of Some Users And Difficulty Verifying Users Details

Hacks Or Viruses Attacking The System And Altering Payments Results. In The Case Of A Power Outage, No Alternate Method Is Available

ENHANCEMENT

We Are Going To Enhance The Online Education System So That Young Stars Has No Worried About The Education He Or She Get Free Information About The How Important Of Education Is In Today's World.

We Also Want To Enhance The Purchase Online Wedding wear So That If Our Members Wants To Purchase The Online Wedding Wear Or It's Related Products For Wedding Than Also It Can Do It Online.
